2015.

Today's T-shirt carries a message more powerful than ever.

Stanley is witty and rebellious. Stella is a jazz-baby, mild and sweet. You might remember them from the classic fifties movie 'A Streetcar Named Desire'.

That film left an enduring image of a young Marlon Brando who, playing the part of Stanley, wore his t-shirts like no man had ever done before. An image that elevated the humble t-shirt into an iconic fashion statement and a means of expression for every generation since.

Today's t-shirt carries a message that's more powerful than ever. A message which demonstrates that looking good can also symbolise having responsible values. Because you know how to get the best out of the world's resources without leaving a trail of destruction.

Stanley & Stella are pioneers in the imprint market, producing fashionable premium print-ready apparel in a sustainable way. All the way. From selection of fibres, manufacturing, distribution and packaging right through to presenting it as yours.

We make clothes people love. Because they're designed to complement the human shape. And produced by a workforce who are fairly rewarded. So you know when you put your name on our garments, you can do so with pride.

Collection AW 2015.

**17 new Styles.
15 new Sweatshirts.
2 new T-shirts.
10 new Colours.**

This winter you'll feel comfy, sweet and warm!
When the cold days arrive we should feel at ease in our clothes. Feeling the warmth and comfort of a nice sweatshirt as if we are cuddling ourselves! With our Autumn winter 2015 collection we are bringing a new way to see the season. From very light sweatshirts right through to heavy ones, everyone can find the what suits them best. Sweet colours and warm tones will bring a 'taste of pleasure' to this season.

Denim Here, Denim There, Denim Everywhere.

For centuries, indigo has shaped fashion. Today, Stanley and Stella is the first in the market to offer the versatility and historical traditions of this iconic colour in a sustainable way. We have used the denim fabric and its variety of tones to create a unique and edgy collection. From T-shirts to sweaters and shirts, there is now a denim style that fits your brand.

Indigo, the colour vibration.

Originally having his roots in Asia, the natural indigo colour was created from a variety of plants. This colour of the rainbow offers a contrast of a natural fibre colour with many shades of blue.

For centuries, this worldwide iconic colour has shaped our fashion trends; today it carries the blue symbolism of a living culture of dye and is rediscovering its versatility, sustainability and historical traditions. These intense and moody colours, distinctive by their variety of tones, offer an essential as well as uniquely edgy touch to our colour range.

Innovating with organic denim.

Denim is a tight weaved fabric (originally a mix of wool and silk, now mostly 100% cotton), which after being dyed with indigo dye colour is used to make jeans.

In the 1960s, denim symbolized youth culture because so many young baby boomers wore denim jeans.

The Denim Revolution is a term used by the radical opposition in Belarus in 2006, and their supporters in the West, who support a color revolution to implement the reintroduction of democracy, to describe their effort and aspirations.

Soft touch fabrics

We only choose fabrics that are both highly fashionable and made from sustainable material, such as organic cotton, Lenzing® modal, Tencel® and linen. All these fabrics are produced using less energy and less water while resulting in less waste.

Awesome detail

We pay close attention to every detail. From the choice of fabric and cut of our garments to the way they're stitched together and fastened. Each piece is different and finished to perfection.

Retail colours

To those colours, add a complete palette of essential colours and enjoy our trendy seasonal tones to find new inspirations for your own creations.

Comfortable apparel

We use the most comfortable fleece fabric with 85% organic cotton and 15% polyester for optimal comfort and perfect resistance. Adding a special finishing to give a dull and mat effect.

Perfect fit

We create apparel people wear. That's why we pay particular attention to the shape and the perfect fit. From Fitted to Oversized, everybody is able to find their own style which fits their shape and body.

Special colour effects

Garment dyed means that apparel is dyed after sewing which gives a shaded used-look effect and creates a vintage look while imparting incredible softness. Our special bicolour tees are made from white/coloured dyed yarns. Upgrade it with your design, it will look great.

Only sustainable fabrics.

100% certified organic ring-spun combed cotton

All our fabrics have been chosen with consideration for their contemporary style and their role as a printing medium. Stanley & Stella only work with eco-friendly materials. Our apparel is therefore made of 100% certified pure organic cotton or blended with fabrics like Tencel® or Modal.

Organic Cotton production improves soil fertility and biodiversity, thanks to diversified crop rotation and non-use of GMOs. Only natural fertilizers and pesticides are used, so groundwater and rivers are kept free of chemicals. At the same time, water irrigation is better controlled. All of Stanley & Stella's organic cotton is certified with the globally-recognized GOTS standards.

As a premium brand, we want to offer you the best. Which is why we choose to only use ring-spun combed cotton. Ring-spun fabric is softer and offers a plain, uniform surface which facilitates the best results from every kind of printing. In addition, the process of combing cotton includes special treatment of the cotton fibres during spinning that cleans them of all dirt, impurities and short fibres. This resulting fabric is comprised only of the longest fibres, making it stronger, longer-lasting. 100% biodegradable.

Tencel®

Tencel® Lyocell, to give it its full name, is the most environmentally friendly man-made cellulosic fibre available today. It is produced exclusively from the wood pulp of Eucalyptus trees, which are sustainably grown on farms.

Tencel® is fashionable, stylish and well-known for its outstanding physical characteristics, being silky soft with a soft-flowing, luxurious drape. It is perfectly smooth, has superb depth of colour, excellent moisture absorbency and is naturally hygienic as it inhibits the growth of bacteria.

Tencel®, the eco fibre, makes it possible to create truly environmentally-friendly products. Blending this with organically grown cotton, instead of conventionally grown cotton, gives consumers the opportunity to experience textiles made entirely of ecologically responsible fibres. 100% biodegradable.

Lenzing® Modal

The Softer Botanic Fibre. Modal is a man-made regenerated cellulosic fibre made from sustainably cultivated forest plantations of beech wood trees transformed into pulp and fibre through the unique Edelweiss technology, based on oxygen-based chemistry. Lenzing Modal is the only sustainable Modal in the world today. Lenzing Modal is the perfect fibre for fabrics worn next to the skin – for day and night, active and relaxation activities. Same as for the Tencel, the botanic principle means that more trees are planted that convert carbon dioxide and water into wood and pure oxygen via photosynthesis. 100% biodegradable.

100% Linen

Skin Microclimate Fibre. Linen is a natural cellulosic fibre from the flax plant, wanted by most high-end stylists because it has exceptional coolness and freshness in hot weather and unrivalled ventilated comfort. Fabric with natural thick/thin/Slub character giving a textured feel, which is considered as part of the linen fabric's particular charm. Produced without waste, and using less energy, less water, linen does not harm nature.

Wool

We have decided to mix Cotton and Wool, to have the warmth of the wool and the softness and comfort of the cotton. This gives a real winter product while keeping the sustainability and the premium quality of the styles. The fabric is soft, really comfortable to wear and warm for the winter season. It also gives a "casual chic" look.

Loose Knit

Loose knit means knitting with large, loose (with less tension than usual regular dense knitting). Loose knitting provides a relaxed casual look with an extremely comfortable feeling thanks to the unbeatable elasticity of the fabric. All print techniques are suitable on the loose Knit fabric, but the loose knit appearance will provide an "open structure" look to prints.

Recycled PET

Developing continuously better and ecofriendly fabrics, we are introducing Recycled Polyester in our collection. The certified recycled polyester yarns come from recycled PET bottles. By recycling the PET bottles, we provide a second life to a waste material with the purpose to offer premium quality products.

Sustainability is more than a label.

Stanley & Stella was conceived from a belief that the textiles industry has to start acting a lot more responsibly. As we see it, change is the only option. And that starts with being aware that every purchasing choice can make a difference.

We can't turn things around alone. But we can pro actively support change by making sure we only work with partners who share our belief and operate according to recognised and certified standards.

We are committed to genuine sustainability right through our supply chain. From organic cotton farmers, yarn spinners, fabric knitters and dyers to garment manufacturers, we only choose business partners who can show us the right certificates and who we've personally witnessed acting sustainably and responsibly within their local environment and treating their people with respect.

Our affiliation with Fairwear Foundation (Corporate Social Responsibility) as well as our high standard certifications (GOTS, OCS 100, OCS Blended, OEKO TEX®, REACH) prove our commitment to sustainable and healthy practices.

Reduce, Reuse, Recycle.

From fibre sourcing to distribution of the finished product, we scrutinise every process and every supplier for sustainability.

Our fabrics are constructed from fibres which are either organically grown or derived from sustainable sources. All of which are produced using less water and without harmful chemicals.

Our yarns are spun and our fabrics knitted and dyed on water and energy-efficient machines. Our wet processing / dyeing conforms with GOTS, OEKO-TEX® and REACH standards, exceeding them where possible. Alternative use is found for the by-products from our manufacturing process.

Our suppliers and people working for them are paid a fair price. And we help them improve their businesses and profitability by sharing knowledge and ideas that lead to smarter operation.

By preserving and properly managing the resources we depend upon, we ensure our business and those we work with can continue to flourish for generations to come.

Fair Wear

Fair Wear Foundation (FWF) is an independent, nonprofit organisation that works with companies and factories to improve labour conditions for textile and garment workers. FWF keeps track of the improvements made by the companies it works with. And through sharing expertise, social dialogue and strengthening industrial relations, FWF increases the effectiveness of the efforts made by companies.

GOTS, OCS Blended, OCS 100

Global Organic Textile Standard (GOTS) is recognised as the world's leading processing standard for textiles made from organic fibres. It defines high-level environmental criteria along the entire organic textiles supply chain, including restricting the use of chemical substances and requiring compliance with social criteria.

OCS Blended applies to all goods that contain a mix of organic cotton and any other material. The OCS 100 tracks the purchase, handling and use of 100% certified organic cotton fibres in yarns, fabrics and finished goods through the use of transaction certificates for factories that don't yet comply to the GOTS standard.

OEKO-TEX® [confidence in textiles]

OEKO-TEX® Standard 100 Class II is a globally uniform testing and certification system applying to raw materials used in textiles, intermediate and end products, at all stages of production.

This certification covers multiple human-ecological attributes, including harmful substances which are prohibited or regulated by law, chemicals which are known to be harmful to health, but are not officially forbidden, and parameters which are included as a precautionary measure to safeguard health. Textile products may be certified according to OEKO-TEX® Standard 100 only if all components meet the required criteria without exception.

REACH compliant

The aim of REACH is to improve protection of human health and the environment through better and earlier identification of the intrinsic properties of chemical substances and through strict use of permitted substances.

Denim Knit colours

Light Washed Indigo C550

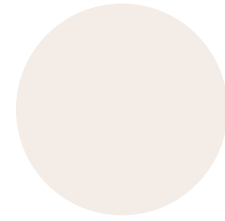

Mid Washed Indigo C551

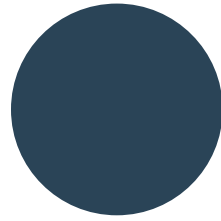

Dark Washed Indigo C552

Denim knit colours are natural indigo dyed items. Each garment may vary in appearance. Denim washed effect will become stronger over time. Colour may transfer by rubbing onto light coloured materials.

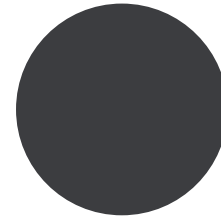

Garment Dyed colours

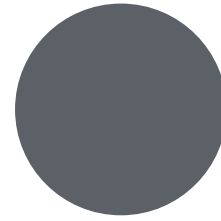

G. Dyed White C507

G. Dyed Blue C508

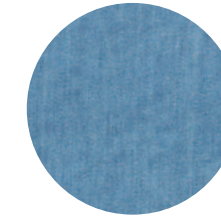

G. Dyed Anthracite C506

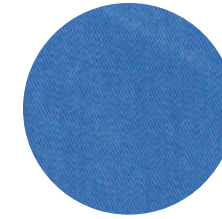

G. Dyed Grey C505

Garment Dyed colours have a unique appearance. In order to obtain this nice and real vintage effect we have used a special process which consists in dyeing the product after its fabrication. The white colour is obtained with a special industrial garment wash.

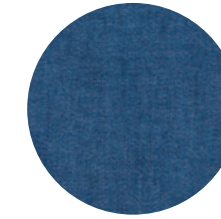

Denim Shirt colours

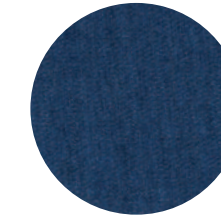

Light Indigo Denim C570

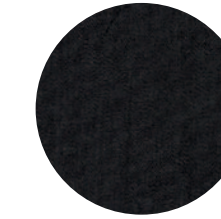

Royal Blue Denim C575

Mid Indigo Denim C571

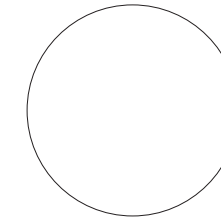

Dark Indigo Denim C572

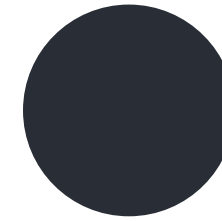

Black Denim C580

Denim shirts colours are natural indigo dyed items (except for Royal Blue Denim and Black Denim that are colour dyed). Each garment may vary in appearance. Denim washed effect will become stronger over time. Colour may transfer by rubbing onto light coloured materials.
